# Haunted History

## Sources

<https://www.hauntedrooms.com/iowa/haunted-places/independence-state-mental-hospital>

The Independence State Mental Institute was one of two mental hospitals in Iowa. Most of the building is in use except for the old parts which are only used for school tours. The building was made in 1873 and was made to relieve crowding at Mount Pleasant State Hospital. This was mainly meant to house geriatrics, alcoholics, and drug addicts.

The construction took more than \$800,000 and it took more than ten years to build. The architect who designed the building was Stephen Vaughan Shipman. He has designed lots of mental hospitals within Wisconsin and Illinois. The hospital is now known as Independence State Mental Hospital.

The old building was used for mostly electric shock therapies. People who go through report whispers, cold drafts, and the feeling of something watching them. The staff in the hospital avoid this area because the staff sometimes hear screams coming from nowhere

# Jack the Ripper

## Part 2, A deeper dive.

When you think of the name, "Jack the Ripper", what do you think of? A clean serial killer who didn't want to be noticed, or a ruthless killer who taunts the police?

Jack the Ripper was an odd Serial killer, he taunted the police and played with his victims after they died. He would usually find his victims on the side of the street, walking around trying to find customers.

### Victims:

There were 5 victims, Mary Ann Nichols (she was found August 31st, 1888), Annie Chapman (she was found September 8th, 1888), Elizabeth Stride (she was found September 30th, 1888), Catherine Eddowes (she was also found September 30th, 1888), and lastly, Mary Jane Kelly (she was found November 9th, 1888).

Of course, with how popular Jack the Ripper is, he's bound to have at least 1 or 2 shops dedicated to him. Actually, there's a museum dedicated to his killings, London in 1888, and more! You can even buy replicas of his letter, newspaper articles, and even some suspect photos.

### End result:

The identity of Jack the Ripper is Aaron Kosmiski, at the time, he was one of the prime suspects. He wasn't found out until after he obtained the name, Jack the Ripper.

But all things must end, because his body was found floating in a river on December 30th, 1888, in the same year of his killings. He wasn't brought down by another person, and didn't die of old age, but he did it himself.

# Alligators

Everyone knows what a crocodile and an alligator is but then you ask how is there a difference between the two. And I shall answer, you see alligators prefer fresh water and their snouts make a distinct shape, the shape of a U .

On this side of the spectrum, we have crocodiles which, opposite from alligators, prefer it in salt water and their snouts are shaped in an A shape.

And crocodiles

Throughout all of these reptilian species We can all say with utmost confidence to never mess with these things(trust me I went to Florida and they are not people animals).

Other than that, here are some other similarities between these two tiny dinosaurs. Crocodiles are They are both reptilian, they both are very similar, they keep growing until they cannot sustain themselves, and they are the Closest thing we have to dinosaurs in this current age. So, if you were expecting a Christmas page NOPE, I went with crocodiles, thank you for reading .

# TOP 5 CHRISTMAS SONGS

By Ella  
Ash

All I want for Christmas was debuted in 1994 in Mariah Carrey's album: Merry Christmas! The classic has been a favorite for years so much that last year Mariah re-made her song last year with a new video.

Little drummer boy is believed to be written by Kathrine K. Davis and debuted in 1941. Pentatonix sung it once and it's in their album called "That's Christmas to me" which was released in 2014. The lyrics are said to be based on an old Czech carol. It was recorded for Decca as "Carol of the Drum" by the Trapp Family Singers 1951 and credited to Davis.

## Polar Bears are Going Extinct!!!

- Today I am going to write about the polar bears! So, I heard about the polar bears becoming extinct what is that all about? You are probably wondering why is this happening he think it is because of global warming. Oh no! The ice caps are breaking apart and the polar bears could possibly drown because they live on ice! How is this happening?
- The Arctic is warming about twice as fast as the global average, causing the **ice** that **polar bears** depend on to **melt** away. Loss of sea **ice** also threatens the **bear's** main prey, seals, which need the **ice** to raise their young.
